## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-15, drawn to separators for a fuel cell, classified in class 428, subclass 457.
  - II. Claims 16-19, drawn to fuel cells, classified in class 429, subclass 34.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the fuel cells can be effectively used any one of the specific separator species set forth below. The subcombination has separate utility such as providing a separating feature. *In this case, Claim AB<sub>br</sub> is an evidence claim which indicates that the combination does not rely upon the specific details of the subcombination for its patentability. Additionally, the claimed plural combinations are evidence that the subcombination has utility in more than one combination. Since claims to both the subcombination and combination are presented, the omission of details of the claimed subcombination Bsp in the combination claim AB<sub>br</sub> is evidence that the combination does not rely upon the specific limitations of the subcombination for its patentability. See MPEP 806.05(c) [R-3] Criteria of Distinctness Between Combination and Subcombination.*

Art Unit: 1745

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

*In addition, further restriction is thus required. Thus, applicant must elect one (1) of the above groups and one (1) of the species below.*

5. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species 1: the first embodiment (Figure 3);

Species 2: the second embodiment (Figure 4);

Species 3: the third embodiment (Figure 5);

Species 4: the fourth embodiment (Figure 6);

Species 5: the fifth embodiment;

Species 6: the sixth embodiment;

Species 7: the seventh embodiment (Figure 7);

Species 8: the eighth embodiment;

Species 9: the ninth embodiment;

Species 10: the tenth embodiment (Figure 8);

Species 11: the eleventh embodiment (Figure 9);

Species 12: the twelfth embodiment (Figure 10);

Species 13: the thirteenth embodiment (Figure 11);

Species 14: the fourteenth embodiment (Figure 12);

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 appears to be generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. A telephone call was made to Scott Harris on 02/07/06 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
